All of us who graduated before you were told: Save the world . . . And you see we managed so far.

My advice is: Forget the world. Have fun, be kind, be honest, make things happen the best way you know how, be humane, and enjoy your lives and good fortune. Maybe the world will be a bit better just for that.

Congratulations!

Consider this:  
It took you only 4 years  
to get this far, it took  
St. Francis 100 years

To the Class of '84:

As you leave the stage with your  
diploma in hand, you will be at the crossroads to  
the future. Some will  
continue their education and then enter  
the job market and may, or may not continue  
their education. Whichever you follow, let  
it be with the knowledge that your  
professors at St. Francis have only  
tapped your potential in the classroom.  
It has been said, whether precisely or  
roughly is unimportant, that most of us  
use only one tenth of our potential. If all  
of us used only fifty percent of our potential  
what a different world this atomic age  
would be! And, what would it be like  
if we all used one-hundred percent of our  
potential? That is the challenge that faces you  
today. Good Luck, but more importantly.

May God be with you always,

Brother Vincent Healy
