

# Math Club

This year, the Mathematics Club works in cooperation with the newly introduced Mathematics Honor Society, Kappa Mu Epsilon.

Moderated by Mr. Donald Coscia, the Math Club provides students with an opportunity to be exposed to topics in Mathematics not ordinarily covered in a classroom, and to the various opportunities available in the field of Mathematics.

Club members meet weekly in two divisions: a Freshman-Sophomore division, which meets with Bro. Leo Quinn, and a Junior-Senior division. Films are shown regularly at these meetings, and students and faculty members give lectures on topics of interest to them. For the Juniors and Seniors, once a month a Graduate School seminar is conducted with Prof. Terrence O'Hara. Here, students are provided with the requirements for graduate schools, and topics of particular importance for Graduate School entrance exams are discussed.

One of the first activities sponsored by the Math Club this year was a field trip to Brookhaven National Laboratories. As in the past, the club sponsors Math Bowls with St. Joseph's College for Women, and Molloy College.

Career Nights are held and students may obtain information about possible careers open to Mathematics majors in fields such as teaching, business, and data processing.

# Computer Club

Computers are not a figment of the imagination. It's what's happening now. Whether one's main interest is in sociology, math, chemistry, business or in teaching kindergarten, one should have some knowledge about the computer.

This is what the computer club does for the students at St. Francis. The club will introduce the computer to them with a chance to learn how to operate and program it.
