

Capt. Thomas Maher explains a few of the nuances of the Selective Service System to a vitally interested group of weeping seniors.

Prof. Doska makes another point in his argument on Red China.

Prof. McGinnis attempts to explain Ronald Reagan explaining Communism.

Ahmed realizes his cat's appetite alarm just sounded.

MATH CLUB adds up

Bro. Leo lectures on the Octahedron.

The Math Club, one of the oldest curricular activities in the school, completed another successful year under the guidance of its moderator, Bro. Leo. Through the administration of its officers, Steve Schwaroch (President) Jerry Benes (Vice-Pres.), Bob Purcell (Treasurer), Jim Tupino (Secretary), and Ron Banasyek (S.A.C. Rep.), it conducted and participated in various functions with Molloy and St. Joseph's College for Women.

In October, the Math Club went to a lecture hosted by Molloy and given by an expert in the field of mathematics. Next, a forum was held at St. Joseph's at which Seniors John Kosta and Tom Bannon were the speakers. Career Night which has been

conducted annually and is a source of information for opportunities for those who are mathematically inclined, proved to be a great success this year—thanks to the time and effort donated by the Alumni. Finally, a Math Bowl was held at St. Joe's and was based on the format of the television regular College Bowl. The team from St. Francis emerged the victor and was hailed by both teams as a great experience to be tried again.

Through its films, lectures, tutoring service and the efforts of Bro. Leo, the Math Club has been a source of great benefit to its members and to the students of St. Francis.

Bob Purcell, Jim Tupino, Ron Banaszek, Jerry Benes, Steve Schwaroch demonstrates the prowess with Fischer—Price toys.
