

# Pi Alpha

Pi Alpha Fraternity, founded in 1906, is the oldest and best remembered of the fraternities. During the 1970-71 academic year Pi Alpha once again fulfilled its aim to the highest and most honorable degree; showing that friendship and brotherly love win out above all.

Pi Alpha is basically a social fraternity but only the brothers themselves realize the true benefit and wealth that comes from its membership. Led by its new archon, Joe Clark, a new moderator, Mr. Enildo Garcia, and a host of officers, Pi Alpha has remained the mainstay at St. Francis College.

Pi Alpha has had a long tradition of being selective in their recruitment of new brothers. This year was no exception. They admitted only four new brothers in the fall semester. The welcomed new brothers are Joe Frysen, Al DeCarlo, Ed Heatherington and Don Drobnicki.

It is unfortunate that every year old members are lost through graduation. However, bonds of friendship and loyalty formed through college years do not cease at graduation, but continue to enrich the lives of the brothers as long as they respect the sacred pledge of membership. Pi Alpha alumni do not leave St. Francis College with only a degree but take along with them long and lasting memories.
