"Knocky", as he is familiarly called, is one of the older members of the Class, as well as being one of the most popular. His election as President of the Senior Class was almost unanimous, and his work on the 1947 FRANCISCAN was invaluable. During the day he carried a full academic schedule, while at night he could be seen taking tickets at Radio City Music Hall—a combination possible only to one with great ambition. No biography of "Knocky" would be complete if it omitted to mention the fact that he is a husband and a father. We wonder how he was able to find time for so many and so varied pursuits.

Brother's pleasing "little boy" smile has won him many friends, but his daring experiments in the Chemistry Lab have nearly caused the loss of many. . . "Roomers are flying." . . .

He "astounds" Brother Leo with his mastery of Calculus and Differential Equations. Will probably spend his old age writing his own book on Methods in Math. Brother also has a latent talent for the slide rule. . . .
