

National Students Association

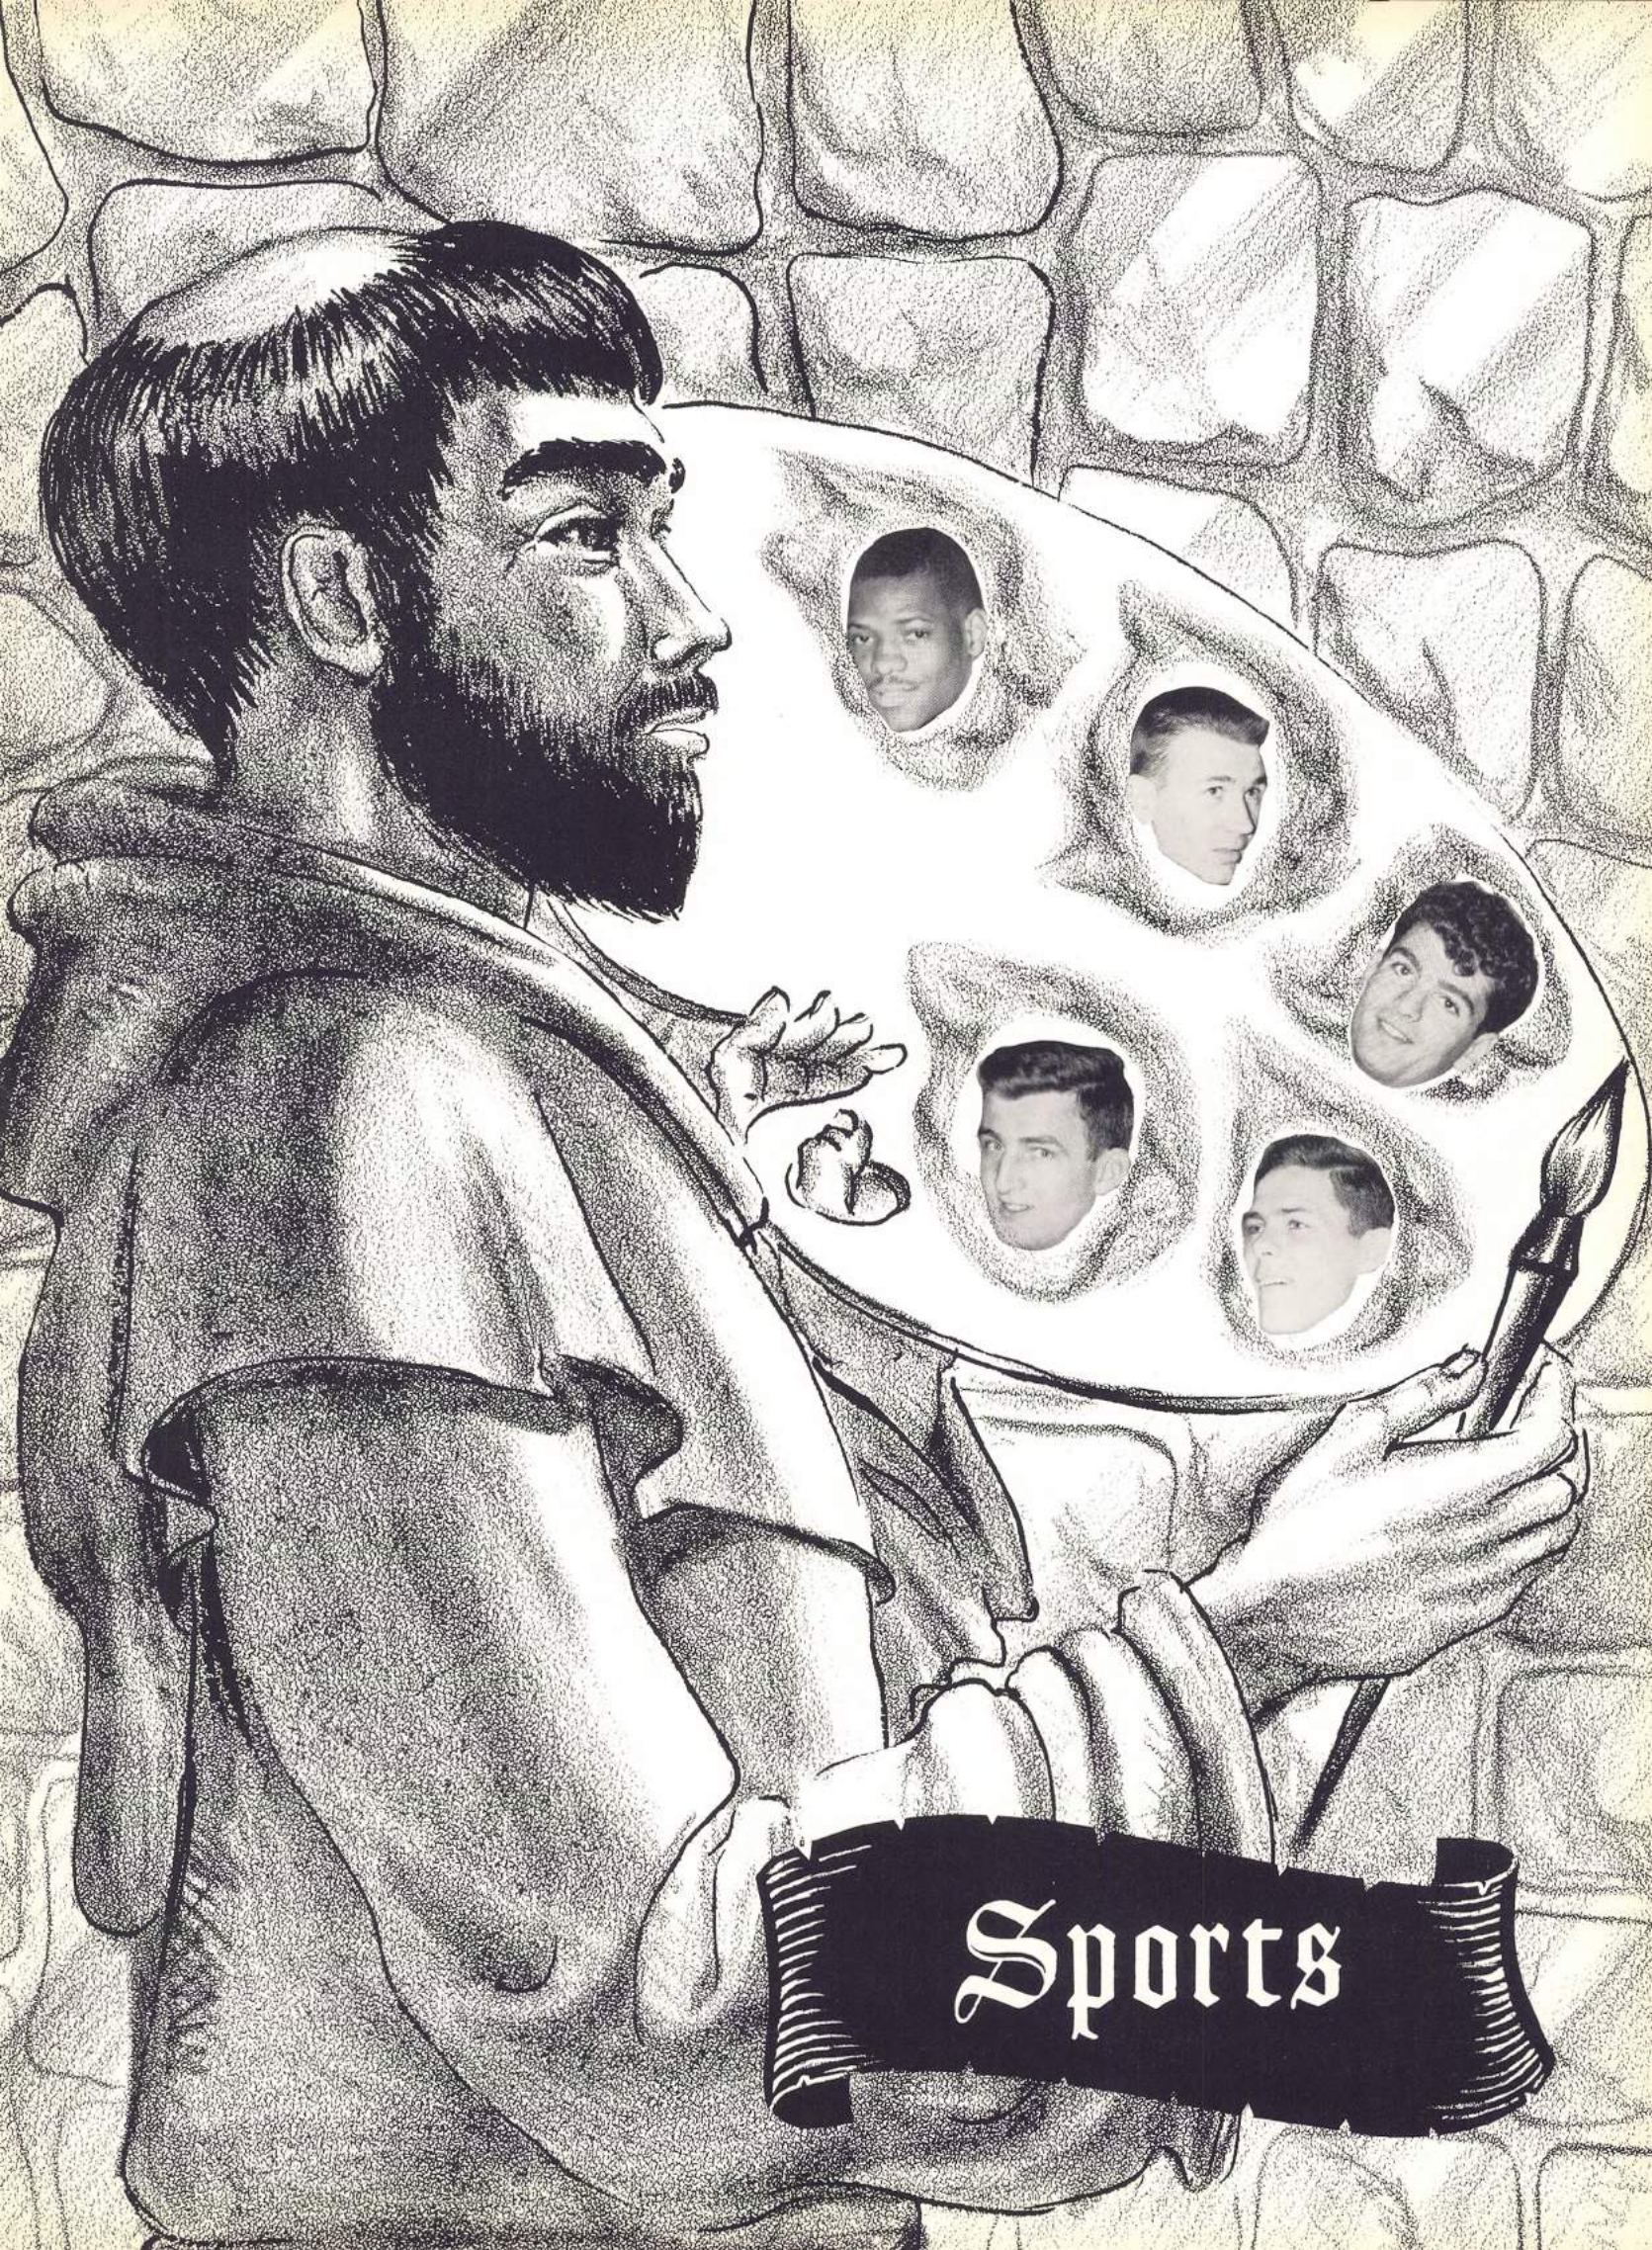

The N.S.A. is a nation-wide organization of member colleges. Working through campus committees, regional commissions, and assemblies, the National staff and the annual National Convention provide an authoritative voice for responsible student opinion and offer to the individual student services in the fields of social, economic, and cultural welfare, educational opportunities, student rights and international study programs.

Under the guidance of Brother Leo, the organization served to stimulate interest in mathematics as it exists beyond the textbook and the classroom.
