

THE PHOENIX

The Phoenix, under the editorship of Richard Kascsak, published one of the most successful editions since its inception. The Phoenix, a journal of scientific articles, is published yearly and has as its main purpose the enabling of St. Francis science students to publish articles in their field. The articles pertain to the fields of biology, chemistry, physics and mathematics.

The Phoenix has proved over the years to be the initial starting point for the publishing efforts of several well respected members of the scientific community, as it is hoped it will be for those publishing in this year's edition.
