Front Row (l-r): Louis Cazzetta; not pictured: Steven Favilla (President)

"Membership in Alpha Phi Delta is eternal and carries with it the obligation of permanent activity and support."

The brothers of Alpha Phi Delta Fraternity at St. Francis College have strived for academic excellence and community awareness for the past forty years. In 1961, Brother Camillus Casey, OSF dedicated his life to the development of our Italian Heritage until the day of his passing in June of 1981. On April 30th 2001, the Brothers of AFD and St. Francis College have dedicated one of the paintings above our school elevators in honor of his permanent activity and support.

Our Greek organization is a part of the National Inter-Fraternity Conference, which represents 60 college fraternities with over 5,500 chapters on nearly 650 campuses throughout the United States. We promote and strengthen the importance and meaning of eternal brotherhood.

For the past three years we have dedicated our time in helping feed the homeless in a community shelter. For the past ten years we have helped the New York State Blood Center organize the blood drive twice a year. The brothers of the Beta Sigma Chapter appreciate the active support of the numerous donors involved in this important cause.

Nov. 7, 2000

For the past academic year the Botanical Society has taken part in a number of events which were geared towards the refurbishment of the greenhouse. The Botanical Society also raised funds towards charity and organized activities to enhance the academic growth of our members especially in the area of Science.

In Fall 2000 the Botanical Society held a miniature Christmas tree sale, the proceeds from which were used to purchase toys. The toys were then donated to St. Mary's Hospital for children in Queens.

The Botanical Society also held a number of talks that were designed to keep us up to date on some of the most recent scientific findings. A symposium was held in which Dr. Burt Goldberg, chairman of the biology department, made a presentation on his most recently published paper. We also had a speaker from CCMP (Coalition Of Concerned Medical Professionals). The Botanical Society also planned our first Alumni Lunch in Fall 2000. Alumni, who are now respected professionals in the area of science, were invited to share with students, who are now aspiring to become scientists and doctors.

The Botanical Society also organized field trips to the Brooklyn Botanic Garden and Pfizer Manufacturing Company.
