

# MATH CLUB

*In order to fulfill the purpose of a co-curricular activity, the Math Club has sponsored lectures, career conferences and contests. Dr. Josephine Mitchell of SUNY and Dr. Jorge Andres of St. Francis have offered the Math Club members stimulating dissertations. Students were given the opportunity to do the same at a Mathematics Forum held with St. Joseph's College for Women. Club members have provided themselves with a wealth of information on career opportunities in Mathematics, through conferences which dealt with the areas of data processing and programming; Operations Research; Actuary; and Teaching at the college, secondary or primary level. This year's activities also included an intercollegiate contest in Mathematics, a tutoring program and the exhibition of film strips.*

*The Math Club's success to date has truly rested on the sincere participation of both the club members and the faculty. For it is the goal of both to provide the interested student with a program of Mathematics outside the classroom.*

# S. E. A. N. Y.

*The Student Education Association is the pre-professional association for college and university students preparing to teach. It is an integral part of the National Educational Association (N.E.A.) a voluntary, independent and non-governmental professional association.*

*The Association program provides opportunities for teachers to: . . . develop an understanding of the teaching profession through participation in the work of local, state and national educational associations.*

*. . . develop an understanding of the history, ethics, organization, policies and programs of these organizations.*

*. . . interest capable men and women in education as a life long career and to encourage selective standards for persons admitted to programs of teacher education.*

*. . . gain practical experience in working together on problems of the professions and society.*
