

## ARTHUR JAMES BASSO

*Army*

*Boys H.S., City College*

*Duns Scotus; Vice Archon Pi Alpha; Indicator Club; Student Council Representative; Who's Who; Senior Class Dance Committee.*

Art Basso, one of the most popular of the seniors, has earned an enviable record in college. After leaving the service Artie became one of the most prominent figures in scholastic standing and extra-curricular activities. Besides his school work Artie gets a thrill playing basketball, football, and baseball. His specialty is the rhumba and samba. After graduation he intends to enter Dental School or continue in the Chemical field—either way he is a sure bet.

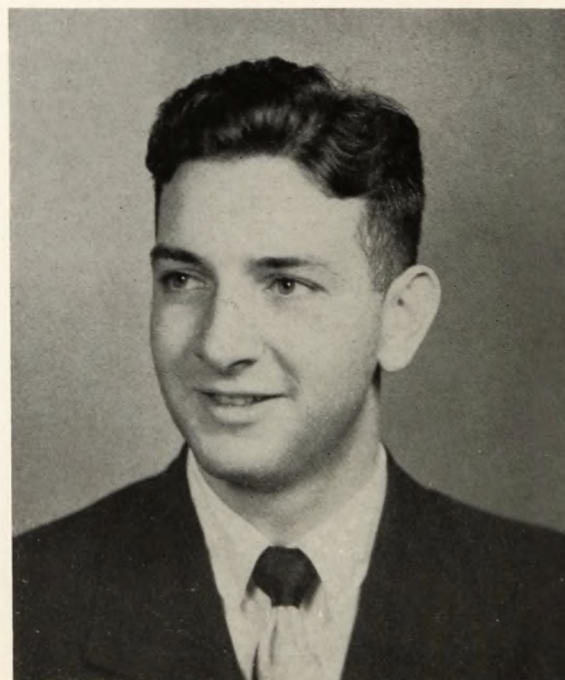

## JOSEPH JOHN BONGIORNI

*Army*

*Manual Training*

*Duns Scotus; Pi Alpha; Indicator Club; French Club; Senior Activities Committee.*

Joe is an oldtimer, for he entered St. Francis in 1941. He left for the Army in 1942, and after a three year hitch, returned to St. Francis. Joe, one of the most popular students, is also one of our better students, as his election to Duns Scotus testifies. Joe is a chemistry major, and he hopes to earn bread and butter for his wife and little girl by going into industrial chemistry.

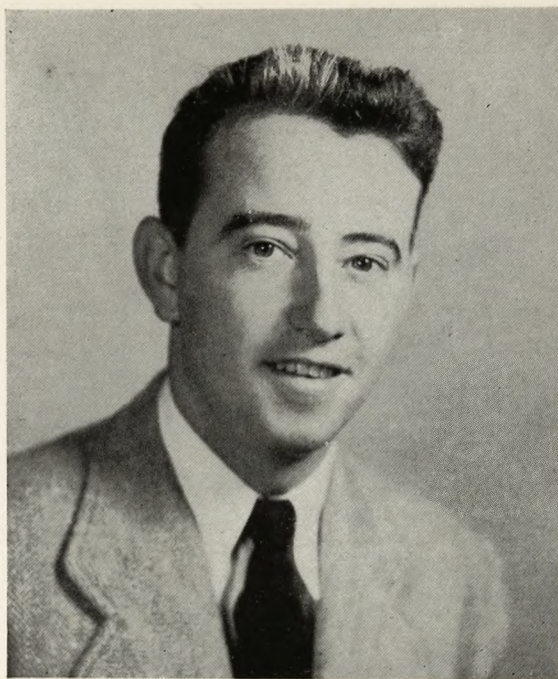

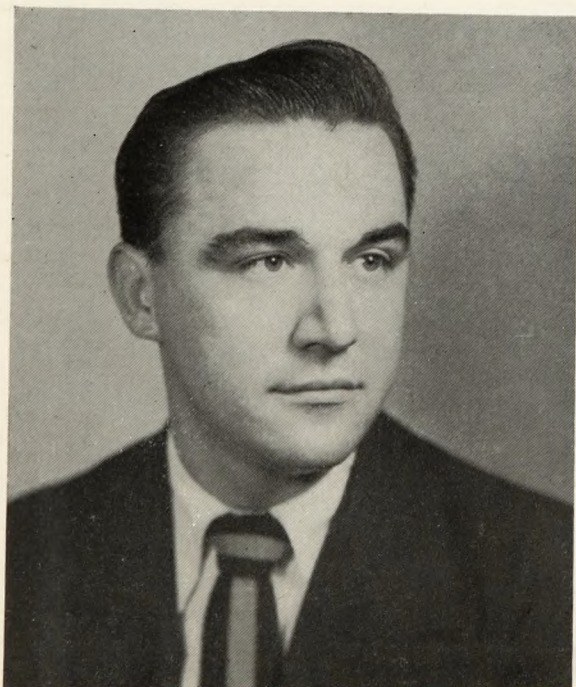

## JOSEPH NICHOLAS BOTTAMEDI

*Army*

*St. Francis Prep, Schriivenham American U.  
Indicator Club; Math Club; Mendel Society;  
CWV.*

"The Ridgewood Rover" has just had a direct wire installed between the Chem lab and Jamaica. He is a Chem major, but is taking Differential Equations on the side. "If we get any more Freshman in this place we'll have classes on Sunday," and "C'mon let's go I haven't eaten for an hour" are what we often hear. Joe has tremendous possibilities of lifting himself above the other science "Barbarians"—reason?—he has discovered an expandable gas far superior to that presently employed by History majors. Joe is entering industrial Chemistry upon graduation.

## CARROLL PHILIP BURKE

*Army*

*St. Francis Prep; Brooklyn College  
Mendel Club, Seminar Group; Glee Club, German Club; Indicator Club.*

You can tell Carroll a mile away by his gray-sprinkled thatch of hair and his quick walk. In spite of his brother's being a chemistry instructor here, or maybe because of it, he's a biology major. His very dry sense of humor should stand him in good stead if he teaches biology, as it does in his married life now. A quiet fellow, swimming is his favorite sport. A well-liked, sincere fellow.

"—AND MY OWN BROTHER TOO!"
