

Guiding the

BROTHER GERALD GILMARTIN, O.S.F.
Director, Guidance Center and Allied Services

JEROME EGAN
Placement Counselor

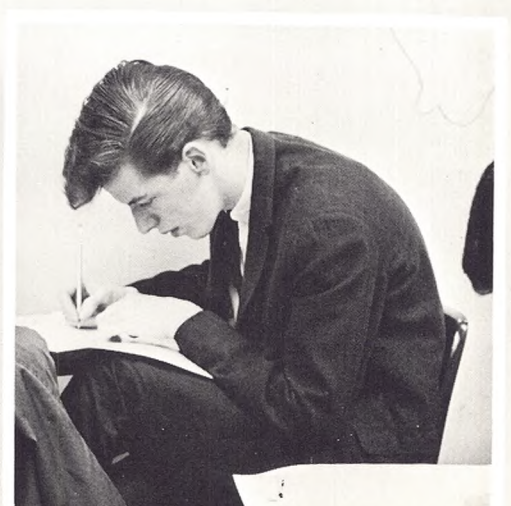

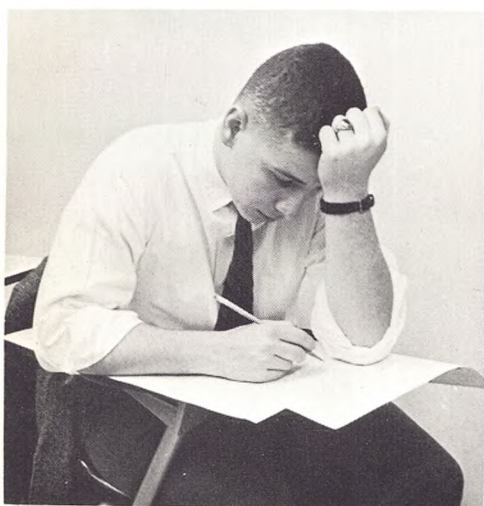

THE Guidance Center maintained its momentum under the new leadership of Brother Gerald Gilmartin O.S.F., formerly of St. Francis Prep, who succeeded Nathaniel Pallone as Director. Tests, interviews, conferences and courses employed by the Center aided St. Francis students to adjust personally, educationally and vocationally to the community. An unusually full round of educational and vocational conferences highlighted the year.

A Career Conference helped give seniors a line on vocational opportunities. Eight panels of professional men discussed career possibilities in social science, accounting, teaching, science, justice, mathematics and the arts. Peter Saxon, Chief Probation Officer for U. S. District Court, Dr. Arthur Jensen, Associate Dean of Flower-Fifth Avenue Hospital and Professor Robert Hanlon of Fordham Law School headed the list of experts participating in the conference. This meeting was followed by continuing placement interviews in which seniors meet individually with recruiters from industry and government.

The significance of the Graduate and Professional School Conference is emphasized by the fact that over 70% of St. Francis graduates go on to graduate schools. Twelve representatives of New York University, St. John's School of Law, New York Board of Education, Columbia University and others conducted workshops on foreign study scholarships, law, medicine, teaching and other fields. Questions and answers on particular aspects of professional and graduate programs followed each guest's presentation.

The Guidance Center provided many special services including aptitude testing for sophomores and remedial reading courses for freshmen. Other services covered a wide range from vocational testing for high school students and adults, to a Teacher Guidance Clinic for Catholic high school teachers. New tools such as Mrs. Dorothy Kelly's "Career-pacs" and individual Craig reading machines gave flexibility to the Center's personnel.
